EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification:

On page one, line 6, the word, "invention" has been inserted between "the" and "relates".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the claims are drawn to a method of preparing carotenoids, i.e., astaxanthin, canthaxanthin, and lycopene, and to an intermediate compound of formula (IV). The closest prior art of record teach the preparation of carotenoids by Wittig reaction of a dialdehyde and a phosphonium salt, as claimed herein; however, instant claim 7 is drawn to a dialkoxy derivative that is neither taught nor fairly suggested by the prior art, said compound being made from the Wittig condensation of a dialkoxy dialdehyde reactant. The process and compound(s) are both found allowable because there is no teaching in the prior art, and no suggestion for a person having ordinary skill in the art to employ a dialkoxy dialdehyde reactant to make a novel dialkoxy intermediate compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
